Subject: Unsolicited application

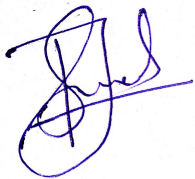

Dear Sir/Madam

I am excited to apply for an unsolicited intern engineering position that was advertised on your website. I have faith that my educational, technical, and interpersonal skills make me an ideal candidate for this vacancy. As an aspiring Computer Electronics engineer, I always have had an avid interest in current and upcoming innovations in this field. With substantial knowledge of electronics engineering, microcontroller, sensors, and programming knowledge from c to c++, python and javascript.

I am contributing to the recent project in prototyping with an international group of three colleagues and obtained substantial experience in 3D designing using Solidworks, SysML, Code, and innovation. This clearly shows my ability to work as a team player. I am highly interested to fill the vacancy for an internship in this field of Engineering. At present, I am doing a B.E. course in Electronics Engineering at Hochschule Hamm-Lippstadt, Germany. I have been into engineering (Science and Math) since my early days of School studies where I always found myself interested in observing how things work. In my high school and in college I have an 80+ % score on my transcript.

I am extremely interested and excited on how my approach will fare in a world full of technological innovation, with new complex problems and what I could provide to a cutting-edge research organization such as Yours.

Kind regards,

Jasmeet Singh Matta
